Subject: Re: Notification emails

Good morning all,

Just wanted to send out a notification that during the drive up to the site this morning (07/15) it was observed that there was a orange color to segment of Cement Ck water between the start of the gravel road above Silverton and below the ski area. The water above the ski area was not affected / colored. The source is unknown and not attributed to site operations. Thank you.

Respectfully,
Andrew Brannon

I agree~or could we change the notification to moderate and above releases? I don't want you to have to go through the trouble if it's a minor release and so far, no one has been alarmed and called about a minor change in color, do you agree Jim and Bruce?
What amount would we classify as significant or moderate vs minor? Or we can leave it the way it is, I am up for suggestions.

Thanks Steve and Andrew, we appreciate your diligence with this.
Becky

Hello Andrew
yes notification via email for minor releases works well. We would ask for a phone call if the release is significant.
thank you
Jim

Good afternoon sir,

As requested by EPA OSC Steve Way would it be ok to email all persons who are currently on the notification list instead of calling each person one at a time? Thank you for support and have a good day.
